FABIO IGNACIO NAVARRO

SOFTWARE DEVELOPER | JUNIOR FULL STACK

PROFESSIONAL PROFILE

Junior Full Stack Developer with experience at the Chaco Ministry of Education, contributing to the development and modernization of Educational Statistics systems. I work with Django, PostgreSQL, and Docker, implement automated tests, and document software features. I am also developing an end-to-end business management system using Node.js, TypeScript, React, and Expo.

PROFESSIONAL EXPERIENCE

Django Developer · Chaco Ministry of Education | Educational Statistics

May 2026 – Present

- **Develop and maintain web modules using Python and Django, build views with Django Templates, and work on REST APIs with Django REST Framework.**
- **Implement relational data models, manage data, and implement validations in PostgreSQL.**
- **Run end-to-end tests with Playwright, as well as unit and static tests; identify defects and verify fixes.**
- **Contribute to architecture modernization, code documentation, and requirements gathering with non-technical users.**
- **Collaborate in agile workflows to improve software organization and stability.**

INDEPENDENT PROJECT

Business Management System · Family-Owned Distribution Business | In Development

Developing an end-to-end solution for business operations, from requirements gathering to web and mobile applications.

- **Build the backend with Node.js and TypeScript, integrating PostgreSQL and Supabase.**
- **Develop web interfaces with React and Tailwind CSS, and a mobile application with React Native and Expo.**
- **Gather requirements and design the system architecture, data models, authentication, and access control.**

EDUCATION

University Technical Degree in Programming · UTN FRRe | In progress · Expected graduation: December 2026

Information Systems Engineering · UTN FRRe | Completed second year · Currently on hold

Informatorio · Level 2: Web Development with Django | Completed: November 2025
